ROLESHARP 2.0 / FORM ARCHITECTURE

Multi-Skill Input & Pre-Flight Review Specification

Eliminates comma-separated textarea ambiguity. Implements discrete row management, keyboard traversal, duplicate prevention, and a modal pre-generation review gate to ensure no false experience is hallucinated.

Skills

4 skills added

Enter one skill per row or choose suggestions below. No comma-separated ambiguity.

#1 Distributed Systems Architecture ↑ ↓

#2 Product Roadmap Architecture ↑ ↓ ×

+ Add another skill

SUGGESTED SKILLS FOR THIS ROLE

[+ SQL] [+ AWS Cloud] [+ System Architecture] [+ TypeScript] [+ Docker]

INTERACTION LAWS & KEYBOARD SPECIFICATION

- Single Row Default: Always opens with exactly 1 primary input row.
- Discrete Inputs: Replaces comma-splitting textarea with individual validated rows.
- Enter Key: Pressing Enter appends next row directly below and moves focus.
- Arrow Navigation: ArrowUp / ArrowDown traverses between skill rows.
- Backspace Prune: Backspace on an empty field removes row and returns focus.
- Reordering: Up/Down buttons prioritize top skills for ATS scanning order.
- Duplicate Detection: Proactive warning alerts user to duplicate skills.
- Empty State Guard: Guaranteed 1 minimum row prevents empty form deadlock.
- Touch & Mobile: Full 44px min tap targets, 16px font floor (no iOS zoom).

PRE-GENERATION VERIFICATION

Review your details before tailoring

Product Truth: Only verified work history, skills, and target job posting are sent. RoleSharp does not hallucinate false qualifications.

TARGET ROLE & EMPLOYER [Edit]
Product Manager · Northwind (248 words analyzed)

CANDIDATE PROFILE & CONTACT [Edit]
Alex Morgan · alex@example.com · Seattle, WA · LinkedIn: /in/alexmorgan

SKILLS INVENTORY (4 verified skills) [Edit]
[Distributed Systems] [Product Roadmap] [SQL & Analytics] [Leadership]

WORK EXPERIENCE & EVIDENCE (2 quantified bullets) [Edit]
Product Lead · Lattice Works (2022 — present)
- Led onboarding experiments that raised activation 12% across 2 releases. [✓ Quantified]
